## About

**The Hamlet of Kings Park, New York**

Kings Park is located along the north shore of Long Island. Home to several local and state parks and bike/hike trails. LIRR & 2 major thoroughfares situated within the downtown.

### Pristine Beaches, Parks & Trails

Kings Park is home to Sunken Meadow State Park, Nissequogue River State Park, Kings Park Bluff & hike and bike trails.

### 67 Minutes

To Penn Station New York

Suffolk County Mass Transit

With service to major job centers in both directions

### Under 20 Minutes to Stony Brook University

10 Minutes to the Long Island Innovation Park at Hauppauge

Sunken Meadow Parkway Lands Steps Away from Downtown Kings Park

### 17 Parks Local & State

- **17,000+ Population**
- **$115,935 HHI (Median)**
- **95% Commute out for work**

### A Place to Put Roots Down

Downtown Kings Park, an approximately 0.9 square mile business district, consisting of a variety of uses, from retail & commercial to institutional and religious with numerous community facilities, clustered around the Long Island Rail Road (LIRR) station and along Main Street (NY 25A) and Indian Head Road, the hamlet’s two major thoroughfares.

- **Restaurant Row: Main Street (Thompson St & Park Ave)**
- **Civic Heart: Main Street (Thompson St and Kings Park Blvd)**
- **Retail: North LIRR to Kings Park Plaza, Tanzi Plaza, Indian Head Road to Stattel Drive.**

Kings Park: A cozy community located on the north shore of Long Island within the Town of Smithtown.

THE COMMUNITY’S VISION FOR DOWNTOWN KINGS PARK is to leverage its many assets – including a centrally located LIRR rail station, excellent connectivity to area job centers, existing downtown infrastructure, strong economy, and proximity to some of Long Island’s most pristine parklands and greenbelt trails – to transform the downtown into a more vibrant, welcoming and walkable neighborhood that will attract transit oriented and mixed use development, spur economic growth, and meet regional housing demand.
The hamlet of Kings Park encompasses approximately 6.2 square miles of land area and approximately 0.4 square miles of water, for a total of 6.6 square miles and has a population of more than 17,000. This community is located on the north shore of Long Island within the Town of Smithtown, Suffolk County, New York. Kings Park is a close-knit community, and residents are predominately older as compared to the general population in Suffolk County.

Downtown Kings Park, comprised of an approximately 0.9 square mile business district, consists of a variety of uses, including retail, commercial, institutional, and religious, as well as community facilities, which are generally clustered around the Long Island Rail Road (LIRR) station and along Main Street (NY 25A) and Indian Head Road, the hamlet's two major thoroughfares.

The immediate area surrounding the downtown consists of mainly single-family and two-family residences, and one multi-family community. There are an additional five multi-family communities located within a half mile of the downtown.

Outside of the downtown are several local and state parks and other significant natural features, such as Sunken Meadow State Park, Nissequogue River State Park, the property of the former Kings Park Psychiatric Center, the Kings Park Bluff, and the Hike and Bike Trail. The Hike and Bike trailhead is located on East Main Street, in the downtown. This trail connects the downtown to Nissequogue River State Park and within 1/4 mile of the Long Island Greenbelt Trail, a 32-mile trail that connects the Long Island Sound and Great South Bay, passing through five state parks. Although resources to encourage a viable and healthy downtown and commercial corridor are present, the economic health of the downtown has been affected by the closure of
To address barriers to revitalization, the Town of Smithtown has undertaken a comprehensive planning process. The 2019 Kings Park Downtown Revitalization Master Plan (VHB Engineering, Surveying, Landscape Architecture and Geology, P.C.), which is currently under development and anticipated to be adopted in Fall 2019, is the culmination of a half dozen studies completed over the last ten years:

- **Kings Park Downtown Market Analysis and Action Plan** (January 2018, Larisa Ortiz Associates)
- **Kings Park & Smithtown: Downtown Opportunity Analysis** (March 2017, Regional Plan Association)
- **Revitalizing Downtown Kings Park Action Plan** (December 2016, Vision Long Island)
- **Town of Smithtown Draft Comprehensive Plan Update** (February 2015, Town of Smithtown Planning and Community Development Department)
- **Final Report: Smithtown and Kings Park Sewering Feasibility Study** (January 2009, Cameron Engineering and Associates, LLP)

1. The Town of Smithtown is in the final process of preparing a Comprehensive Master Plan (H2M Architects + Engineers) which incorporates the Kings Park Downtown Revitalization Master Plan and will guide future development and projects in the larger community to support the revitalization of the downtown.
The plan also presents a series of succinct goals derived from previous planning efforts and analysis of information gathered during community engagement exercises in 2018 and 2019. Priority items include:

- Aesthetic enhancement
- Expansion of goods and services
- Improved access and connectivity for motorists, pedestrians, and bicyclists
- Improved quality of life for residents
- Creation of a more active and vibrant downtown
- Expanded housing options, especially for the young workforce population and empty-nesters
- Encouragement of transit-oriented development
- Preservation and, where possible, expansion of public spaces

The 2019 draft plan presents key concepts and implementation strategies to address identified land use, transportation, infrastructure, and economic development opportunities. Collectively, the key concepts provide the direction that the community and Town, with DRI funding support, will use as a guide to achieve the overall vision for downtown. The key concepts are organized around major themes that will build momentum for actions that will help transform downtown. Concept 2: Guide the quality and character of new development in downtown Kings Park with Design
Concept 1: Implement a new Downtown Zoning District

Concept 2: Guide the quality and character of new development in downtown Kings Park with Design Guidelines

Concept 3: Streamline the approval process in order to attract new development

Concept 4: Reinforce a downtown identity and theme to strengthen the retail community

Concept 5: Functional Improvements that will Reinforce Connectivity

Concept 6: Reinforce Connectivity to the Neighborhoods

Concept 7: Welcome the Pedestrian

Photo of recently renovated state-of-the-art Flynn Memorial Ballpark complex (April 2021) which has generated increased tourism and local patronage to Downtown Kings Park
DRI investments will catalyze revitalization by implementing the strategies identified in the Town’s downtown revitalization plan for Kings Park.
The plan provides a Downtown Kings Park Framework model (shown in Section 7) that reinforces the key concepts. In addition, the plan identifies four “opportunity sites” that can serve to target future development by expanding retail and housing choices, enhancing the core area and meeting the needs of changing demographics while supporting goals for economic development.

1. Municipal Lot on East Main Street - This underutilized parking lot represents an opportunity to meet a number of objectives: to expand the open space at the corner of Main Street and Indian Head Road/Church Street; to integrate housing into the Main Street mix; and to create a more defined gateway entry at this location.

2. King’s Park Plaza – This existing shopping plaza provides an opportunity for a true mixed-use redevelopment with new retail and housing options that take advantage of the proximity to the train station. Residential uses would be located on the upper stories with commercial and retail uses on the ground floor.

3. Meadow Road West, east of Municipal Lot – Located east of the municipal lot on Meadow Road West, this site presents an opportunity for mixed-use development with retail and housing options proximate to the train station.

4. Meadow Road West, west of Municipal Lot – Located west of the municipal lot on Meadow Road West, this site should be viewed as a longer-term opportunity for providing housing within easy walking distance of the train station.
1) Boundaries of the proposed DRI area

The Kings Park downtown boundary encompasses a land area of approximately 0.9 square miles. It consists of commercial and mixed-use corridors along the following roads: Main Street, between Park Avenue and Kings Park Boulevard; Church Street, between Main Street and the Kings Park Branch of the Smithtown Library parking lot; Indian Head Road, between the Main Street and Stattel Drive; and Meadow Road West between the Petro property and the Clayton Funeral Home. See map.

This boundary has been primarily derived from the proposed boundaries for new sewering in the central business district, as described in Cameron Engineering and Associates’ January 2009 Feasibility Study.

This planning, visioning and engineering work supports the revitalization scenario and demonstrates that downtown Kings Park is well positioned as an emerging market for new mixed-use development. The recent planning efforts will provide a blueprint for action. The total investment in these plans exceeds $1,000,000 cash plus thousands of Town and County staff hours.
2) Past investment, future investment potential

RECENT PLANNING EFFORTS:

Town of Smithtown Comprehensive Plan (anticipated adoption: January 2021) is currently under development by H2M Architects + Engineers. This is a townwide comprehensive plan that will guide policy, development, and investment throughout the Town. It will support and facilitate the implementation of the Kings Park Downtown Revitalization Master Plan.

The Kings Park Downtown Revitalization Master Plan (SEQRA REVIEW) was produced by VHB Engineering, Surveying, Landscape Architecture and Geology, P.C. It draws from all prior studies listed below and informs this DRI application. Funding was provided by Suffolk County.

Kings Park Retail Market Assessment and Action Plan (January 2018), completed by Larisa Ortiz Associates with funding from Suffolk County.

Kings Park & Smithtown: Downtown Opportunity Analysis (March 2017) completed by the Regional Plan Association with support from the Town of Smithtown Planning Department and funded by the Suffolk County Industrial Development Agency.

Revitalizing Downtown Kings Park Action Plan (October 2016) prepared by Vision Long Island with funding from the Kings Park Chamber of Commerce and Kings Park Civic Association.

Draft Town of Smithtown Comprehensive Plan Update (February 2015), prepared by the Town Planning Department.

Sewer studies funded by Suffolk County Department of Public Works:
- Sewering Feasibility Study (2009) by Cameron Engineering & Associates
PUBLIC INVESTMENT

SEWER FUNDING: Because most properties in the downtown currently rely on cesspools and septic tanks, Suffolk County Health Department regulations for wastewater collection and disposal make it impossible for most small properties to accommodate adequate onsite disposal systems for additional development such as second or third floors, or expansion of restaurants. In order to address this limitation, and clear away barriers to development and revitalization, New York State has pledged $20,000,000 toward installation of a sewage collection system to convey wastewater to the Kings Park Sewage Treatment Plant. On January 10, 2017, in his State of the State address, Governor Andrew Cuomo announced this investment as part of a larger infrastructure improvement plan on Long Island to support economic growth and environmental sustainability. Cuomo indicated,

"These major, transformative investments in Long Island’s core infrastructure invest in the future resiliency and strength of the region”...“Vital water infrastructure projects will support environmental sustainability and bolster economic growth. With these projects, we equip Long Island with the tools and resources to drive commercial activity, create jobs and build a stronger Long Island for generations to come."
NYS DEPARTMENT OF ENVIRONMENTAL CONSERVATION DIVISION OF MARINE RESOURCES
HEADQUARTERS: NYSDEC is investing approximately $40M towards the construction of a new 25,000 sq. ft. building and marina at Nissequogue River State Park that will serve as its DMR Headquarters. This project is expected to bring approximately 100 jobs to the park and secondary economic benefit to downtown businesses as the employees will likely walk or drive to the downtown for lunch and after-work activities.

PULASKI ROAD MUNICIPAL PARKING: On October 3rd, 2019 County Executive Bellone officially signed the bill awarding the Town of Smithtown $500,000 in "Jumpstart" funding to build a municipal parking lot in downtown Kings Park located on Pulaski Road, just off Main Street. The municipal lot was completed (November 2020) within one year and contains 23 spaces, an electric vehicle charging station with two spaces for EV vehicles, and state-of-the-art LED cost-efficient lighting. The lot is surrounded by ornate fencing, and is fully landscaped with evergreens, and arborvitae which provide additional privacy for the surrounding residency.

FLYNN MEMORIAL BALLPARK: The Town of Smithtown invested approximately $7.8M to rebuild Flynn Park into a premier baseball complex and tournament center. The park is approximately 1.8 miles from downtown Kings Park and has already begun to generate a secondary economic benefit to the downtown. In addition to housing visiting leagues throughout the Northeast during weekend tournaments, Flynn Memorial Ballpark hosts thousands of Smithtown Baseball and Softball players, in leagues young and old.

RENOVATION OF THE SMITHTOWN LIBRARY – Kings Park Building: In 2011-2012, the Smithtown Library completed a $3M renovation of the Kings Park Branch, adding 1,500 SF and increasing overall usable space to 11,500 SF.

PEDESTRIAN IMPROVEMENTS: Suffolk County is also redesigning the intersection of Church Street and Main Street with curb bulbouts and new crosswalks to improve pedestrian safety. The County has allocated $150,000 (including a $75,000 grant from Empire State Development) for design costs for this project. The County has also replaced approximately 200 feet of sidewalk along Indian Head Road with new sidewalk and decorative brick snowstrips.
PUBLIC INVESTMENT

PRIVATE INVESTMENT

HUDSON PLACE APARTMENTS: The Farrell Group recently completed construction of a 36-unit apartment complex on Indian Head Road, approximately 0.5 miles from the downtown.

KINGS PARK PLAZA: Brixmor Property Group, the owner of Kings Park Plaza, has been exploring redevelopment options and is awaiting the adoption of the Kings Park Downtown Revitalization Master Plan before submitting a redevelopment proposal. The Town anticipates that there will be significant investment to redevelop this property.

BUILDING RETROPTS FOR EXPANSION: There are two projects underway to retrofit one-story buildings in the downtown to ready them for second floor expansion once the sewers are installed. The Town anticipates similar additional projects in the next few years.

DAY CARE FACILITY: In May 2019, the Town approved a Special Exception permit to HPG Properties to construct a 10,000 sq. ft. day care facility at the northwest corner of Indian Head Road and Old Northport Road, approximately 0.9 miles south of the downtown. Expansion of access to childcare is a statewide priority in this year’s NYS Consolidated Funding Application programs.

KINGS PARK SOLAR: In June of 2019 the Kings Park Solar Project was completed. Located on 27 acres of privately owned land that was once used as a landfill, this land is now being used to create energy for 1,000 homes in the community. Additionally, the Project is a stimulus for the local economy in many ways, as it created 50 construction jobs using local labor, and generates $800,000 in tax benefits for the town.
3) Recent or impending job growth

The 2009 Sewering Feasibility Study estimated that an additional 379,000 square feet of residential density could be created based on the added capacity from new sewers and without changing existing zoning. This could create up to 379 additional residential units (assuming 1,000 SF/unit). The January 2018 Kings Park Downtown Market Analysis and Action Plan, which assessed retail leakage, demographic and related factors, determined that this projected residential growth would create more captive demand for downtown businesses. Using current figures for spending per household in the Primary Trade Area, the Market Analysis estimated that the new residential development would add spending potential of almost $20M to the downtown and would provide even more supportable square footage of new retail. It is estimated that the existing 215,000 SF of retail space in the downtown could increase by up to 70% under this development scenario.

Assuming, conservatively, that there are approximately 2 employees per 1,000 sq. ft. of retail, this development could lead to over 300 new jobs, in addition to service-related jobs.

Additionally, the NYS Department of Environmental Conservation Division of Marine Resources building will bring roughly 100 jobs to the downtown area.

This growth potential and proximity to the LIRR and regional roadways are factors that will support vibrancy in the downtown. Further, planned connectivity under Suffolk County’s Connect Long Island bus rapid transit initiative would make Kings Park an even more strategic place for businesses and workers.
4) Attractiveness of physical environment

HISTORIC DOWNTOWN CENTER: Downtown Kings Park has a rich history as a center of civic, economic, and cultural activity. Despite the development of shopping centers and malls that have redirected most shoppers away from downtowns, this district has survived and continued to adapt with the support of the community and the assets that distinguish it: the LIRR station; regional arterials that provide service to regional job centers; a concentration of shops and restaurants in a compact, small-scale commercial center; and high quality public open space and natural features.

NATURAL FEATURES: Kings Park offers immediate access to some of Long Island’s most unique trails, parks, beaches and other waterfront landscapes. These characteristics are prized by the region’s diverse population and promote community livability, and include Sunken Meadow State Park, Nissequogue River State Park, the property of the former Kings Park Psychiatric Center, the Kings Park Bluff, the Hike and Bike Trail, and Long Island Sound. The Hike and Bike trailhead is on East Main Street, in the downtown. This trail connects the downtown to Nissequogue River State Park and within ¼ miles of the Long Island Greenbelt Trail, a 32-mile trail that connects the Long Island Sound and Great South Bay, passing through five state parks.

Together, Sunken Meadow State Park, Nissequogue River State Park, and the Kings Park Bluff create approximately 1,800 acres of contiguous parkland and over 3 miles of publicly-owned waterfront, all within a short drive or bike ride from downtown.
COMMUNITY FACILITIES: The downtown features a fire house, library, the Long Island Railroad station and commuter parking with multimodal connectivity, municipal parking, Kings Park Veterans Plaza, a public plaza and Russ Savatt Park at the LIRR Station, and other public plazas. Community events held downtown include parades (e.g. St. Patrick’s Day, Kings Park Day, High School Homecoming, Youth Baseball and Softball Opening Day), festivals, and live music.

OPPORTUNITY AREAS: As noted in the Justification section, the draft 2019 Kings Park Downtown Revitalization Master Plan identifies four "opportunity sites" that can serve to target future development by expanding retail and housing choices, enhancing the core area and meeting the needs of changing demographics while supporting goals for economic development. See the Transformation Projects section for details.

To encourage the improvement of the business and pedestrian environment for downtown Kings Park the Town of Smithtown will encourage mixed-use development that offers a variety of housing options, and will utilize regulatory tools to promote walkability, establish design guidelines, and create standards for the public realm, such as signage, architecture, landscaping, and environmental resources.
5) Quality of Life Policies

The Town’s community-engaged planning efforts are building toward development of quality of life policies. In 2016, the Kings Park Chamber of Commerce and Kings Park Civic Association engaged Vision Long Island to facilitate community discussions and draft a conceptual plan that would reflect residents’ vision for the Kings Park downtown. The resulting Action Plan presented results of a visual preference survey (for sidewalks, streets and crossings, community spaces, parking, commercial storefronts, housing, and architecture); presented analyses and recommendations for land use and zoning, sewering, commercial space, residential space, public and recreational space, mobility and parking, character and aesthetics; and proposed a series of short, mid- and long-term implementation projects across these domains. This plan memorialized community consensus and provided a framework for subsequent planning efforts. Overall, it reinforced the notion that downtowns are healthier, more vibrant places when more people live in transit-oriented residential and mixed-use infill development.

The 2019 draft Kings Park Downtown Revitalization Master Plan builds on prior planning work and emphasizes quality of life issues. The primary goal of the plan is to create a healthy, walkable downtown area that is attractive to both residents and visitors. A new Downtown Kings Park Zoning District (D-KP) would implement land use goals to promote mixed-use and transit-oriented developments and encourage desired housing types such as townhouses or apartments over first floor retail. The plan states that accessory apartments should be allowed as-of-right above Main Street commercial businesses, with two-story apartments closer to residential areas and three-story apartments should be permitted closer to the train station. Ground floor retail should be encouraged along the primary roadways of Main Street and Indian Head Road. Along commercial/shopping streets such as Main Street and Indian Head Road, buildings should front the sidewalk allowing shoppers to easily view window displays and activity within the businesses. On secondary roads that are more residential in nature such as Meadow Road West, Church Street, or Renwick Avenue, a modest setback is appropriate to allow for some landscaping and privacy to residents within the building.

Photos: From the 2017 Kings Park & Smithtown Downtown Opportunity Analysis, Regional Plan Association
The zoning ordinance will also provide for creation of a business improvement district as well as address parking, pedestrian activity and walkability, streetscape, signage, wayfinding, stormwater management and related items. The plan also recommends development of design guidelines to guide the quality and character of new development.

Photo simulation from the RPA depicts the type of infill development with residential uses above ground floor commercial spaces that would be enabled by a downtown rezoning.

6) Public support

There has been a tremendous amount of public participation throughout the planning process and overwhelming support from local leaders and stakeholders to implement the recommendations that have emerged from these efforts. The Town and County government are fully supportive of the proposed revitalization efforts. Governmental support is evidenced by investment in planning studies, sewer infrastructure upgrades, creation of additional municipal parking, and pedestrian improvements.

The Kings Park Civic Association and Kings Park Chamber of Commerce continue to be effective advocates for the downtown by sponsoring visioning meetings, engaging the community in progress updates, encouraging participation in public meetings, and continually working to implement recommendations contained in the planning studies that have been completed so far.

Community support for the proposed DRI transformative project is reflected in the numerous planning studies that have been completed over the past decade, all of which have incorporated public outreach and engagement. The draft 2019 Kings Park Downtown Revitalization Master Plan provides a clear basis for the proposed DRI transformation projects. Community feedback was collected from Kings Park stakeholders during at a community workshop for the Town of Smithtown Comprehensive Plan on April 11, 2019 and again in a virtual presentation on January 21st, 2021. Feedback and video recordings can be found online at www.publicinput.com/smithtown or at www.smithtownny.gov/648/Draft-Comprehensive-Plan.

The DRI local lead will be Town Supervisor Edward Wehrheim.
The proposed Transformative Projects are specified in the draft 2019 Kings Park Downtown Revitalization Master Plan and are included as Attachment 1. They include zoning ordinance amendments, creation and implementation of a façade improvement program, municipal parking, streetscape improvements, pedestrian infrastructure improvements, relocation of utility wires, and dozens of other projects.
The plan also identifies four “opportunity sites” that can serve to target future development by expanding retail and housing choices, enhancing the core area and meeting the needs of changing demographics while supporting goals for economic development. They are depicted in the Justification section above, and are described as follows:

1. MUNICIPAL LOT ON EAST MAIN STREET - This underutilized parking lot represents an opportunity to meet a number of objectives: to expand the open space at the corner of Main Street and Indian Head Road/Church Street; to integrate housing into the Main Street mix; and to create a more defined gateway entry at this location.

2. KINGS PARK PLAZA - This existing shopping plaza provides an opportunity for a true mixed-use redevelopment with new retail and housing options that take advantage of the proximity to the train station. Residential uses would be located on the upper stories with commercial and retail uses on the ground floor.

3. MEADOW ROAD WEST, EAST OF MUNICIPAL LOT - This site presents an opportunity for mixed-use development with retail and housing options proximate to the train station.

4. MEADOW ROAD WEST, WEST OF MUNICIPAL LOT - This site should be viewed as a longer-term opportunity for providing housing within easy walking distance of the train station.

Town of Smithtown Comprehensive Master Plan January 2021, Proposed Zoning for Downtown Kings Park
Downtown Kings Park Framework Plan
Map Source: Town of Smithtown Kings Park Downtown Revitalization Master Plan 2019, VHB Engineering, Surveying, Landscape Architecture and Geology, P.C. In collaboration with Vision Long Island
8) Administrative Capacity

The Town of Smithtown has sufficient internal capacity to manage this initiative. A Grants Committee accountable to the Office of the Supervisor provides a central coordination mechanism for proposal development, implementation, financial reporting and compliance activities. The Town has experienced professional staff in the Procurement office, Comptroller office, Town Attorney, and within its Engineering, Planning, Traffic Safety, Highway and other divisions who are capable of administering contracts once projects are selected for award. Partnerships with civic organizations will facilitate community engagement in revitalization projects.

9) Other

As part of Suffolk County Executive Steve Bellone’s Connect Long Island initiative, the Kings Park LIRR station has been proposed as one endpoint of a Bus Rapid Transit (BRT) corridor. This BRT corridor is proposed to run from the Babylon LIRR station to the Kings Park LIRR station largely utilizing the Sagtikos/Sunken Meadow Parkway. The development of this BRT corridor is dependent upon numerous factors, including the widening of the parkway, and the proposed development of Heartland Town Square (site of Pilgrim Psychiatric Center in Brentwood). However, as it comes to fruition, it will make Kings Park a more desirable destination for all segments of the diverse Long Island community to live, work and play.

Re: Downtown Revitalization Initiative Round V – King Park Downtown Revitalization

Dear Ms. Longworth, Mr. Law and Mr. Rabinowitz,

I write to express my unwavering support for the Town of Smithtown’s Downtown Revitalization Initiative (DRI) application for the hamlet of Kings Park. I have had the privilege of being a part of a unified effort between residents, businesses, and local community groups invested in comprehensive, community-engaged planning efforts to identify assets and opportunities for revitalizing the historic downtown of Kings Park.

- A downtown master revitalization plan is now in the final environmental phase.
- A tremendous public input effort has been underway to include the residents and the small business community in the planning efforts for revitalizing the area.
- The State of New York, recognizing the economic, development and environmental benefits of wastewater treatment, has committed $20 Million to connect the downtown to the existing Kings Park sewer system.
- The expansion of Sewer District #6 is slated to break ground in just seven short months.
- The newly constructed transit oriented development; Indian Crest (aka Hudson Place) luxury apartments, has begun the leasing of 1 & 2 bedroom apartments, which includes workforce housing for our younger generation and first time homeowners.
- The NY State DEC has begun construction of a green, sustainable building which will house the Division of Marine Resources headquarters at Nissequogue River State Park.
- The Town of Smithtown has completed a $7.8 Million Dollar Renovation of Flynn Memorial Park, bringing back the USSSA (Softball league) to Kings Park, which has generated a tremendous amount of foot traffic, tourism and already delivered an economic boost to our downtown.
- The State of New York has begun the public input phase of a comprehensive master plan for the Nissequogue River State Park.
The Town’s proposed transformation projects are a direct reflection of the community’s vision for its future. Strategic investments supported by $10 million in DRI funds will be leveraged to create optimal conditions to restore parks, preserve our precious open space and incentivize smart growth development, which will benefit the economy and the daily lives of both Kings Park residents and the Long Island region.

It is with enthusiasm that I respectfully request that you add my name to the list of those who support the Town’s proposal.

Sincerely,

Re: Downtown Revitalization Initiative Round V – King Park Downtown Revitalization

Dear Ms. Longworth, Mr. Law and Mr. Rabinowitz,

I am writing in support of the Town of Smithtown’s application for the Round V Downtown Revitalization Initiative (DRI) for Kings Park. Over the past decade, residents, businesses, civic groups, the Town of Smithtown and Suffolk County have invested in comprehensive, community-engaged planning efforts to identify assets and opportunities for revitalizing the historic Kings Park downtown.

- A downtown master revitalization plan is now in the final environmental phase.
- A tremendous public input effort has been underway to include the residents and the small business community in the planning efforts for revitalizing the area.
- The State of New York, recognizing the economic, development and environmental benefits of wastewater treatment, has committed $20 Million to connect the downtown to the existing Kings Park sewer system.
- The expansion of Sewer District #6 is slated to break ground in just seven short months.
- The newly constructed transit oriented development, Indian Crest (aka Hudson Place) luxury apartments, has begun the leasing of 1 & 2 bedroom apartments, which includes workforce housing for our younger generation and first time homeowners.
- The NY State DEC has begun construction of a green, sustainable building which will house the Division of Marine Resources headquarters at Nissequogue River State Park.
• The Town of Smithtown has completed a $7.8 Million Dollar Renovation of Flynn Memorial Park, bringing back the USSSA (Softball league) to Kings Park, which has generated a tremendous amount of foot traffic, tourism and already delivered an economic boost to our downtown.

• The State of New York has begun the public input phase of a comprehensive master plan for the Nissequogue River State Park.

These are significant achievements, however there is still much work to be done after the revitalization master plan is finalized. The community will need resources to implement the revitalization plan’s recommended actions to complete the new sewer system, improve roadway, pedestrian, streetscape and storm water infrastructure, develop new zoning codes and design guidelines, and undertake related actions to incentivize mixed-use, sustainable, transit-oriented development.

The Town’s proposed transformation projects are a direct reflection of the community’s vision for its future. We all came together, spoke our minds and the Town has truly listened.

Strategic investments of $10 Million in DRI funds will be leveraged to create optimal conditions to restore our parks, preserve our precious open space and incentivize smart growth development which will benefit the economy and quality of life for residents of Kings Park and the Long Island region.

On behalf of the chamber of commerce, I respectfully request that you add my name to the list of those who support the Town’s proposal.

Sincerely yours,

Anthony Tanzi Jr
