

Elaine Coleman, Parent, Stop Common Core in Yonkers

"Common Core is a Federally Mandated mess thrust upon the children of NYS . It has no academic credibility nor does it acknowledge a child's chronological age. It is the actual supposed standards that are set at the wrong age level not all of the testing that is the problem. Our children were smart and creative prior to cc and that needs to be brought back. Daily computer testing is also not the answer either. We know what you are going to do and we won't stand for that either. These are our children and we will not allow them to be used or abused."
