

Paula, Parent

"First let me say that I'm tolerant of some things Common Core is trying to do. For instance when you move from one state, oh heck even schools that your on the same page you left off. Other than that though Not at all. What you are doing to My children and everyone else's is bullying! My children and most others don't fit into the mold so you Test and test and test. Oh you cant pull this grade let's see what happens when we say this much instruction time so that means NO Recess. I have seen children cry, throw tantrums and get mean because no matter what they do you've deemed it not good enough! I could say TONS more but I'd only get angrier! You should be ashamed of yourselves, everyone of you money making politicians and Rich people who came up with this Unrealistic idea! I'm seriously thinking of pulling my children out of "Public" schools! It's really bad when the American people have to "PROTECT" our children from the over reaching hands of the government."
