

Walter Adams, Parent

I am not in favor of the tests for the 3rd and 4th grade. The tests cause so much unnecessary anxiety and stress for the children, schools and teachers. The focus becomes all about the tests in school and not about actually learning. Students who don't do well on the tests learn to dislike school and get depressed about not doing well on the tests. The children are too young to be required to take these tests.

Please stop requiring that the young children be required to take the tests.

Thanks,
Walter
