

**Lauren Agostino, Parent**

I am writing you today because I am a parent that has watched my son suffer in school because of the common core curriculum that was mandated when he was in 3rd grade, currently in 6th. There is a limit to words here and I'm sure you are all well aware of the flaws and where it is failing our children and their future. Its unfortunate that education is now part of politics with no regard for a child's well being.

Please get rid of common core on New York.
