

Barbara, Parent

I am a grandparent caretaker for my grandson.. My children went thru public school education and I never in the years of having to reinforce the HW assignments to help them review the days classroom work seen a child so clueless/frustrated to doing this common core work.

If a child is already struggling in reading they will now be struggling in Mayh with All the word problems n arrays that have to be drawn explained by how's n whys in a math question

What was wrong with the old fashion way of learning how to multiply/divide..
Add/subtract

Our children are frustrated loosing interest.. What's next for struggling kids.. They will loose interest /fall behind because they are being used as guinea pigs to see if this circulum works.. Please get rid of the common core
