

**Camacho's, Parent**

Useless way of teaching our children. I believe on the evolution of education due to technology and the advancements in today's world in the many areas of schooling. Taking the joy, love and passion from teachers, students and parents at home trying to help it is exhausting and depressing.

Please hear us out, there are more of us against the Common Core than those that seem to think that is a better of education our children, our future.

Sincerely, The Camacho's
