

Brian Chase, Parent, Byram Hills schools in Armonk

These sorts of programs dictated by State and Federal government should only be for schools with subpar graduation and college admission rates. Clearly things at Byram Hills had been working well considering its top 20 ranking in NY State over the last several years. If things aren't broke why fix them. Please unshackle us from this needless regulation and centralized control. We can clearly take care of ourselves. We don't need a big brother to help us out. Please utilize my hard earned income taxes for children and schools that actually need the help.
