

Sarah Fitzpatrick, Teacher, Lancaster Central Schools

Although I agree with raising the bar in terms of educational standards, the way NYS has gone about it is counterproductive. The EngageNY modules (especially math) are deadly and contain many inaccuracies...paper-folding in 5ths???? Aside from the fact that we're subjecting children to countless hours of testing, the tests aren't designed to see what children know and are capable of doing, they are designed to trick kids! Have you seriously read those passages and some of the questions? I teach 10-year-olds.

If you want to evaluate my teaching, come into my classroom. Please accept this open invitation.
