

**Denise Gentile, Parent, Sag Harbor School District**

"The font is too small to read, especially at grade 5. The work space for answers is too small , especially at grade 5 and 6. The work is seriously sophisticated. I am not yet sure if content and tasks are at all appropriate for grade levels they service.

The concepts of TRICKERY and FAILURE seems to be built into the program , predictably . This is simply unnecessary and not at all good for the student's moral . I suggest combing the entire program for incidents of this and clearing this out of the curriculum ENTIRELY. Personally, how dare the writers introduce this into my child's life. Aside from these points and wanting a thorough edit and rethink of the materials for age appropriateness , I support common core."
