Mary Goodfellow, Parent

"Common Core is a complete disaster, and we the people know it. I find it insulting, that you think the parents do not know your game plan. CommonCore was designed to dumb down our children, globalize our citizens, and get rid of traditional teaching as we know it. Bill Gates is a power hungry man who wants everyone using his IPADS. We also are aware of all the data you are collecting on our children. We are aware that you want compliant non thinking children. We are aware of the complete indoctrination going on in our history lessons. You are lying to our children and changing the facts of our country's history. We will never stop fighting for our children. We will not rest until Common Core is completely gone."
