

Sharon Hiltbrunner,

"I am an 82 yr old great grandmother with a great granddaughter in kindergarten who attends school at Ballston Spa and was shocked to find that she has homework 4 nights a week. Evidently the curriculum from 1st grade was moved into kindergarten. Some of the homework requires abstract thinking. How is this? play time & socialization time is limited due to the requirements of common core. These are 5 yr olds. I do not understand what is being accomplished. Our kids are being turned into robots. Also, I do not believe the legislature or Gov Cuomo should be calling the shots in our education system. They should leave that to the professionals & parents."
