

Julia, Parent

"Common Core needs to be dropped!!!! It is beyond frustrating to me how it was EVEN approved to go into our schools. All it has done is bring on unnecessary stress, anxiety and struggle on these poor kids of all ages! My 1st grader hates doing homework and is just exhausted everyday. What he has to know now and even last year in Kindergarten is absolutely ridiculous!! From Math to reading levels. And I hear so many horror stories about the bigger grades as well. Who cares what other countries are learning. We did just fine all these years doing work the old way. The people that created Common Core should be ashamed of themselves! Making children cry from confusion and exhaustion. How they are allowed to mentally torture (cause thats what it is)these kids and get away with it, is just terrible! Every person who approved CC, should also be ashamed! I could say a lot worse, but I wont. If it all comes down to more money in many pockets, that's a disgrace! I wish to find away for every teacher and student even principals to walk out and not return until CC is dropped for good. Don't they see the videos, read the articles from all over on what these poor kids are experiencing??!!!!??? How hasn't it been stopped! Why can't the mayors or governors, even the damn president put a stop to CC!"
