

Jessica Kurtz, Parent

"The writing samples given to students through at least 5th grade are absolutely atrocious. I have seen no evidence that my 3rd and 5th grader are being taught how to write correctly. They have no inspiration when the common core writing samples are so poorly written. The wording of questions for ELA and math is extremely bad. My 3rd grader is using five websites at school to monitor her learning. This is NOT teaching. After experiencing a gifted and talented public NYC school and a public school in Westchester, I am fed up. Get back to Grammar, regular math, art, music, movement. Test students ONCE in elementary, middle, and high school."
