

Toniann Miraglia, Parent

"As a parent and paraprofessional for the DOE - I see first hand the frustration in these kids eyes. I understand rigor but who are we kidding ? Is it necessary- I don't think so. Rigor comes within a person and can not be pushed upon. We want our children to stay young as long as possible- feeding them this common core is shooting for the wrong outcome. Please for the sake of the children get rid of it ! If our law makers would take these test my guess they would all fail!"
