

Maria Proudiss, Parent, Rye Neck School District

The Common Core math has wrecked our home life and destroyed my daughter's self-esteem. It is developmentally inappropriate. There are too many steps involved which confuses my daughter(as well as myself, and I do bookkeeping for work!) My daughter gets upset and throws tantrums as soon as I say the words math homework. She says she is stupid and dumb. It has disturbed her mentally and emotionally so much that we are seeing a therapist. In addition many kids are being tutored as young as first grade. So to assess a teacher is wrong because the tutors are really the ones helping kids to pass!!
