

Bobek Shayegani, Parent

"While I sure Common Core is well-intentioned, and also, while I support holding schools to account, the common core as now experienced is complete disaster. Our school is being rolled back, our kids are paying the price. The bureaucracy and competing political interests (is there any competition?), as resulted in an abomination. We do homework with our children and are appalled by what you did to math. My kids have regressed, and we are catching them up outside of school. Is memorizing anything now inappropriate? Seeing this format wrecks of political bias. Girls and minorities can handle math, and can do it without converting math to English. Allow our local school officials to follow the path of preparing our children for life and college without your ivory tower out of touch solution. I look forward to hearing from you if you believe these sentiments I voice are not my own.

Thank you"
